

Slipper Pads

Westley Plastics Slipper Pads have an international reputation and are used in hot and cold rolling mills around the world as a replacement for expensive brass and bronze components.

Slipper Pads made from Westlon, our proprietary nylon material, are extremely durable and efficiently absorb shocks and blows. They are also engineered to optimise lubricity to increase machine lifespan and service life.

Westlon Slipper Pads are manufactured using the latest polymer technology and are available in a variety of shapes and sizes to suit any application.

Key Benefits

- Improved wear life compared to traditional materials
- Improved productivity due to reduced downtime
- Lightweight making it easier and safer to fit
- Decreased wear on mating components
- Low material scrap value reducing potential thefts
